

SPEECH
PROCESSING
SOLUTIONS

You have experience as

DevOps Software Developer Azure (f/m/d)

You thrive in a global environment? An agile development environment is your daily business?
You love to develop your own product ideas and bring them proactively to life?
Then we are looking for you!

We are YOUR place to work, if you value proactive collaboration in a highly professional team with an entrepreneurial, innovative attitude...if you like the stable environment of a global market leading organization, however thriving in a startup mentality...if you want to develop and implement your own ideas...if you are passionate about software-development with C# and JavaScript. Thrilled?

How you spend your day with us

- Analyze and improve our Azure cloud infrastructure and apply a programmatic approach to increase uptime and scalability
- Develop, design and enhance our cloud application with ASP.NET and ASP.NET Core
- Design and implement new features around speech processing solutions
- Contribute in creating architectures and technical specifications

What you bring in

- 3-5 years of professional experience as DevOps Developer with Azure ASP.NET MVC, C# and REST API Design
- You are passionate about technologies such as CSS/HTML/JavaScript/JQuery, TypeScript/AngularJS
- You have knowledge in IT infrastructure (Windows server administration, IIS, Azure deployment, Network operations, Azure SQL)
- You love to work in an agile development environment and you have experience with SCRUM or Kanban
- You know tools such as Visual Studio and GIT
- You have experience with databases (preferably Azure/MS SQL)
